

Machining

Philford can produce a variety of different sized components in quantity or as individual items.

- Turning capability is in excess of 1000mm diameter and up to 5 metres in length
- Philford specialises in one-off and unusual machining. Our engineering staff work from drawings or samples and achieve a very high standard of workmanship often with little information
- We can redesign obsolete items and repair pieces that are scarce or difficult to obtain.
- If you have a problem in obtaining something or need quality consumable parts, large or small, Philford can offer a unique service in this field
