

Material Handling Systems

Philford can design, manufacture and install full turnkey materials handling systems. All designs are supplied with complete calculations, parts books and will be CE marked.

- We overhaul, or supply new, any section of most types of conveying systems. This includes full drives (drums, gearboxes, drive gears and drive structure), remote head ends, receiving sections, return ends, loops, including carriages, and much more
- Chain conveyors and bucket elevators of any width or length can be supplied or overhauled, including repair or renewal of sprocket assemblies and gearboxes
- Philford has comprehensive experience in materials handling in many diverse applications
- No matter what your materials handling requirements are, Philford can offer a solution
